Egy Córodalca

készítette: Balázs Réka, Brinzik Boglárka

2023 áprilisában lehetőségünk nyílt eljutni Spanyolországba, Córdobába az ESN program segítségével. Februárban jelentkeztünk a projektre és azóta izgatottan vártuk a vasárnapot, amikor útra kelhettünk Európa másik felébe.

Az ott töltött napjaink célja az volt, hogy megismérjünk egy másik kultúrát és megtekintsük a világörökségi helyszíneket a városban. Ottlétünk során sokat tanultunk a spanyol gasztronomiáról, építészetről, és persze körbejártuk Córdobát.

In April 2023, we had the opportunity to go to Córdoba, Spain with the help of the ESN program. We signed up for the project in February and since then we had been excitedly waiting for the Sunday when we could set off to the other side of Europe. The purpose of our journey was to learn about another culture and to see the world heritage sites in the city. During our stay, we learned a lot about Spanish gastronomy and architecture, and of course we went around Córdoba.

1st World heritage

- Mosque—Cathedral of Córdoba

It served as a mosque for Muslims for over three centuries before being converted into a cathedral. The building is renowned for its unique blend of Islamic and Christian architectural styles, and its ornate interior.

2nd World heritage

The Jewish quarter

The Jewish Quarter of Cordoba, also known as Judería, is a historic neighborhood located in the heart of the city. Once a vibrant center of Jewish life in medieval Spain, it is now a popular tourist destination known for its narrow streets, white-washed houses, and charming courtyards. The Jewish Quarter is home to several significant landmarks as well.

3rd World heritage

Patios

It is a popular cultural event in the city, where locals open their private courtyards to the public, showcasing their beautifully decorated patios filled with colorful flowers and plants. The event takes place annually in May, and it is a celebration of Cordoba's unique architecture and cultural heritage.

4th World heritage

Medina Azahara

The Medina Azahara is an archaeological site located on the outskirts of Cordoba. It was once a magnificent palace-city built by the Umayyad Caliphate in the 10th century, showcasing the Islamic civilization's technological and architectural achievements. The Medina Azahara is now a popular tourist attraction, drawing visitors to its impressive ruins, including the grand palace, administrative buildings and courtyards.

A program során befogadó családok vendégszeretetét élveztük. Mind a gyerekek, mind pedig a szülők nagyon kedvesek voltak velünk.

Sok helyi finomságot kóstoltunk meg, és nagyon érdekes volt egy kicsit a spanyol mentalitás szerint élni az életünket.

Nagyon jól éreztük magunkat és reméljük egyszer még visszatérhetünk ebbe a csodás városba.

During the program, we enjoyed the hospitality of host families. Both the children and the parents were very kind to us.

We tasted a lot of local dishes and it was very interesting to live our lives a little like the Spanish people.

We had a great time and we hope to return to this wonderful city one day.

Thank you
for your attention
